The New Dwarf **CUPFLOWER**

(*Nierembergia Hippomanica*)

TESTING new plants for over fifty years we have never seen a plant which produced the tremendous quantity of blooms that the new Dwarf Cup Flower does. Last year the plant was completely covered with flowers by Decoration Day. It was still completely covered on October 1st. Throughout the spring and summer the plants had so many flowers that it was almost impossible to see the foliage.

We have never tested a plant which had so many uses. For filling in holes in the shrubbery or the flower garden, as an edging plant or in a rockery, for window boxes or for pot culture, it is equally valuable. As a bedding plant or for cemetery work we do not believe its equal exists. It is gorgeous in any situation.

The introducer says that it is not quite hardy and will require some protection. However, as this is written (January 15th) our own test plants have not been damaged by the winter. Hardy or not, it is one of the cheapest as well as the finest things that can be planted. It costs only about half as much as such common bedding plants as Geraniums, which produce only five or six blooms a year against a thousand Cupflowers.

The color of the flowers is a lovely lavender-blue with a touch of gold at the center. The foliage is gray-green and the plant grows about six inches tall. 3 for 75c; \$2.00 per doz.; \$13.00 per 100.

GARDEN**

Elliott Nursery Co.
Evans City, Pennsylvania

The Sensational New RUSSELL'S LUPIN

Scabiosa Fischeri

Gorgeously lovely flowers 3 inches in diameter, colored a splendid rich, deep violet-blue. The plants grow 2½ feet tall and the stems are 2 feet long. The flowers are produced throughout the summer and early fall, and supply great quantities of the most fascinating of cut flowers. 3 for 85c; \$2.50 per doz.

SCABIOSA - Blue Beauty

The newest Scabiosa with a deeper color and larger flowers than Fischeri. 3 for \$1.00; \$3.00 per doz.

If wanted by parcel post, add 13c for each 3 plants; 27c per dozen plants.

The New Baby's Breath

(Gypsophila, Bristol Fairy)

Gypsophila, Bristol Fairy, is incomparably the finest of the Baby's Breath. It is truly a wonderful introduction producing large panicles of double white flowers on which the individual blossom is larger than anything that has gone before, and the color is the purest white. It flowers continuously and profusely throughout the season. 50c each; 3 for \$1.25; \$4.00 per doz.

The New Pink Baby's Breath

(Gypsophila Pacifica)

Excepting that the flowers are pink instead of white and the plant slightly smaller, the pink Baby's Breath is like the white Bristol Fairy. The pink color is lovely and the flowers are produced all summer. 55c each; 3 for \$1.35; \$4.50 per doz.

THE spring of 1938 will long be remembered as the first introduction to American gardeners of Russell's New Lupin — the most splendid plant evolved in over a century of plant breeding. In variety, vividness and richness of coloring, this plant defies description. Crimsons, scarlets, oranges, yellows, pinks, blues; every conceivable tint and shade is present in every possible combination. The flower stalks of this new wonder are 4 feet or more tall, strong and sturdy, long lasting and crowned with flower spikes 2 feet long. The florets are closely packed on the stem and have wide-spread fan-shaped back standards and keels as large as a half dollar. Undoubtedly something new and splendid had appeared in the world, the equal of which had never before been seen.

Thoroughly tested in Great Britain, Russell's New Lupin was known to be satisfactory in every soil and every condition from Landsend to Northern Scotland and throughout Ireland. The only question remaining was, "what will the plant do in America?"

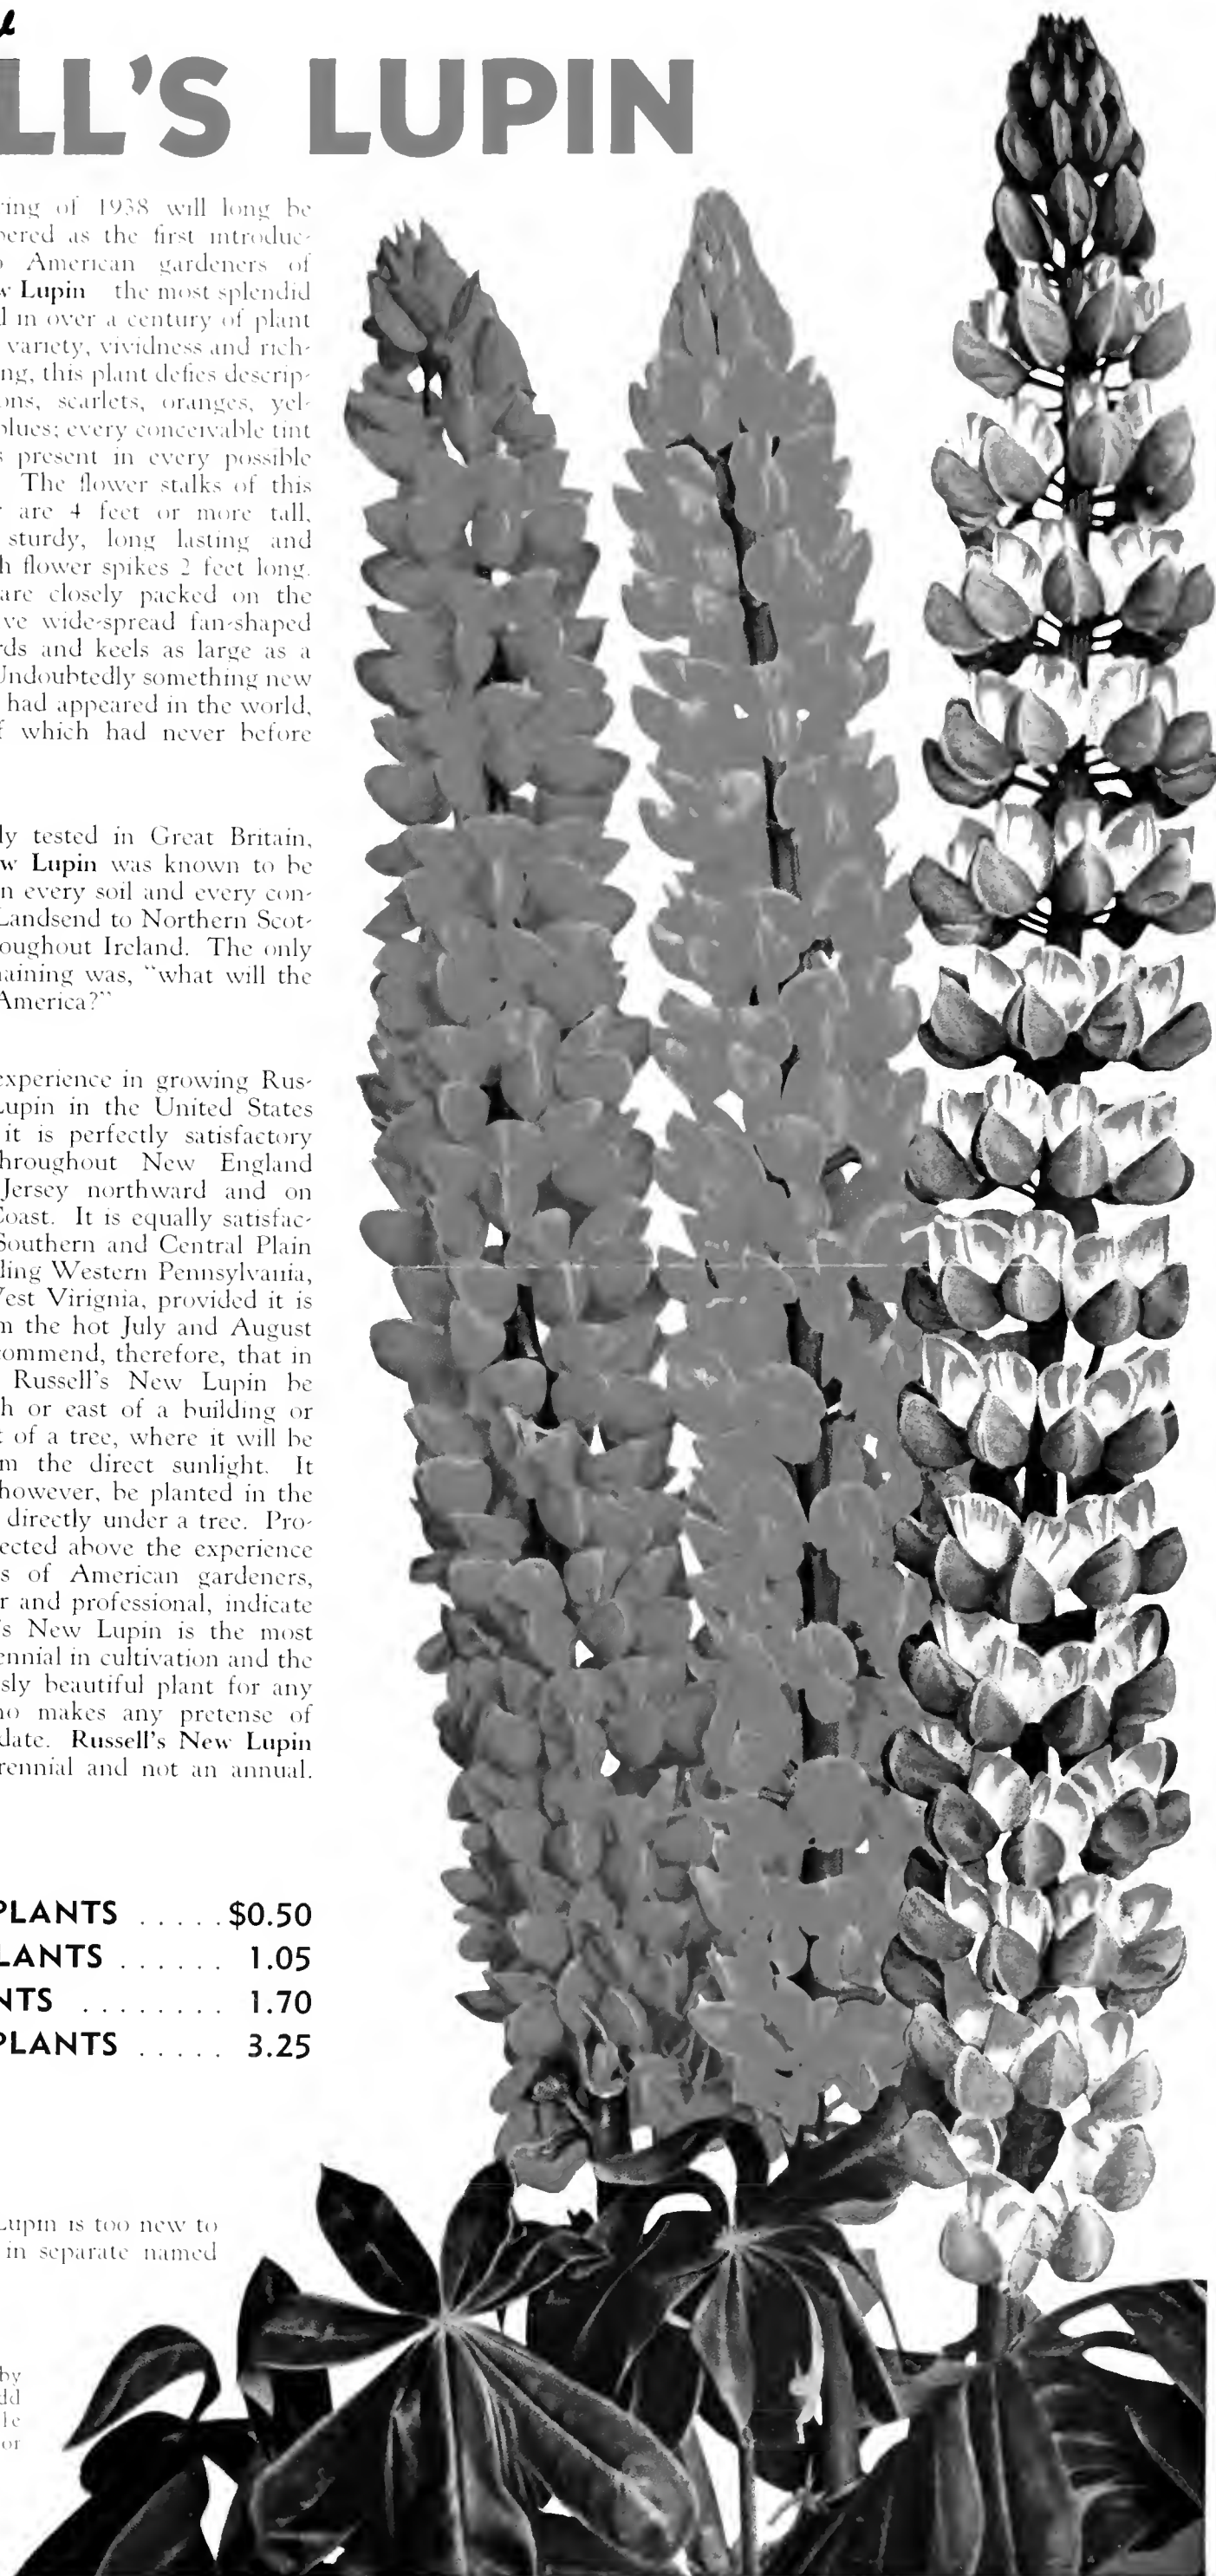

A year's experience in growing Russell's New Lupin in the United States proves that it is perfectly satisfactory anywhere throughout New England from New Jersey northward and on the Pacific Coast. It is equally satisfactory in the Southern and Central Plain States, including Western Pennsylvania, Ohio and West Virginia, provided it is shielded from the hot July and August sun. We recommend, therefore, that in these states Russell's New Lupin be planted north or east of a building or north or east of a tree, where it will be shielded from the direct sunlight. It should not, however, be planted in the full shade as directly under a tree. Protected as directed above the experience of thousands of American gardeners, both amateur and professional, indicate that Russell's New Lupin is the most splendid perennial in cultivation and the most gloriously beautiful plant for any gardener who makes any pretense of being up-to-date. Russell's New Lupin is a true perennial and not an annual.

SINGLE PLANTS	\$0.50
THREE PLANTS	1.05
SIX PLANTS	1.70
DOZEN PLANTS	3.25

MIXED PLANTS ONLY

Russell's Lupin is too new to be available in separate named colors.

If wanted by parcel post, add 9c for single plants, 15c for three plants.

Tall Hardy PHLOX

The Foundation of the Garden
(Non-Patented Varieties)

Africa. A new brilliant carmine-red Phlox with a blood-red eye. The flower heads are enormous. Specially fine variety. 3 for 85c; \$2.75 per doz.

Beacon. A tall Phlox, 36 inches high, with gorgeous cherry-red flower heads borne on straight, strong stems. The best light red. 3 for 80c; \$2.50 per doz.

Blue Hills. The nearest to blue and incomparably the best. 3 for 85c; \$2.75 per doz.

Daily Sketch. The newest and loveliest of the pink Phlox. Tremendous trusses and individual flowers. Truly magnificent. 3 for \$1.00; \$3.00 per doz.

Feuerbrand. Vivid orange-scarlet flowers produced in enormous quantities continuously throughout the season. The most splendidly brilliant Phlox in existence. 3 for 80c; \$2.50 per doz.

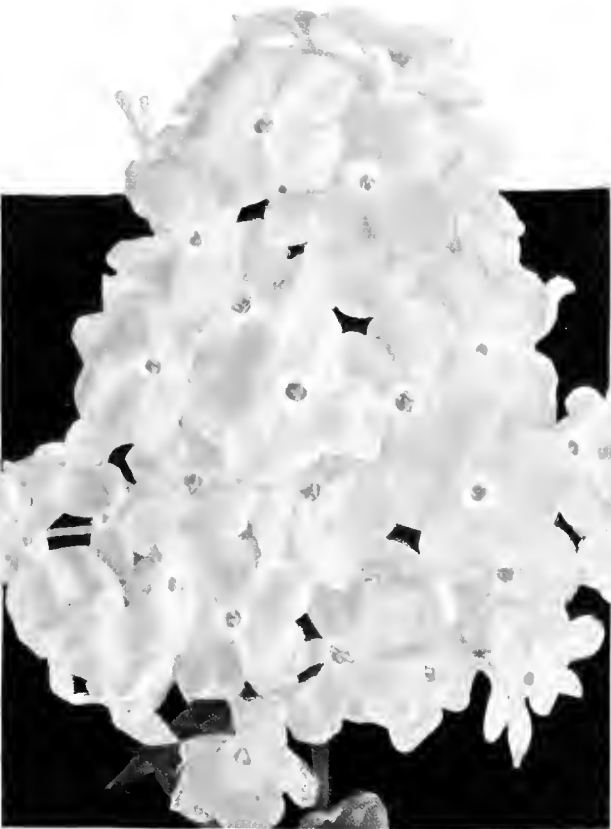

Miss Lingard. The plant has beautiful, long, shiny leaves, and is absolutely free from all diseases. It produces from 2 to 3 crops of flowers a season from June until October. The flower heads are immense and the individual flowers are of the loveliest, clean, pure white, with just a faint pink shading in the center. The best and most satisfactory Phlox. 3 for \$1.00; \$3.00 per doz.

Pink Beauty. A new Phlox of the Miss Lingard type having all its merits. It has the same fine foliage, freedom from disease, and flowers as often and as finely. The flowers, however, last about twice as long as Miss Lingard, and the color is the loveliest clear mauve-pink. 3 for \$1.00; \$3.00 per doz.

Rinestroom. Lovely rose-pink. Both flowers and trusses are of immense size and the color is intensified by a brilliant carmine eye. Truly superb. 3 for 80c; \$2.50 per doz.

Phlox Augusta

Phlox Columbia

New Phlox, Augusta (Plant Patent No. 252)

Plant breeders, yielding to the insistent clamorous demand for a cherry-red Phlox, have somewhat prematurely developed several. All of them, however, have had one grave fault; namely, the flowers would bleach and discolor in the sun. The new Augusta is not only the most brilliant, the most intense, and most sparkling cherry-red Phlox in existence, but the color remains perfect under all weather conditions. The plant grows 2½ feet tall and the sturdy stem and the firm foliage colored rich bronzy green. Vivid and beautiful Augusta will supersede all the older Phlox of similar color. 3 for \$1.50; \$4.50 per doz.

New Phlox, Columbia (Plant Patent No. 118)

The color is an exquisite cameo-pink with a faint blue eye and produces an effect never before seen in Phlox. The clearness of tone is remarkable, and the marvelous brilliant color does not fade into purple as the flower ages. The flower crop is immense. A well-grown plant will produce 15 flower spikes 2½ feet high. Unquestionably the finest of the pink Phlox, and probably the finest of all Phlox. 45c each; 3 for \$1.10; \$3.30 per doz.

New Phlox, Tigress

After a century of effort the plant breeders have at last given us a real flame-colored Phlox!

We have, of course, had flame-colored Phlox before, but in the past breeding this color into Phlox weakened the plants severely and frequently they did not bloom. Meanwhile disease and insects took their toll of the weakened strain.

The new Phlox, Tigress, is the realization of the Phlox lover's dream. The plants grow tall and sturdy—equal, in this respect, to Columbia or Miss Lingard. There is no suggestion of disease or weakness and the flowers are immense, the largest that grow, and the color is the true vividly brilliant orange-scarlet-flame that the world has sought for over a century. Tigress is incomparable in its magnificence. 50c each; \$5.00 per doz.

If wanted by parcel post, add 10c for six Phlox.

Japanese Windflower

Japanese (Anemone Japonica) WINDFLOWER

COMING into bloom the last week in August and lasting until cut down by heavy frost in November, blooms the glorious Japanese Windflower. The lovely flowers are about the size of a dollar and are borne in tremendous profusion on stems 2½ to 3 feet tall. The flowers may be single, double, semi-double, and the colors white, pink or red. The Japanese Windflowers not only create the finest imaginable effects in the September garden but are the finest of all possible cut flowers. They have long been a favorite of Mr. Elliott's and when he was practicing landscape architecture he never failed to include them in substantial quantities in every garden he designed. The Japanese Windflowers are among the truly outstanding perennials.

Alba. Single flowers of the purest, cleanest white with a rich yellow center. 3 for 80c; \$2.50 per doz.

Alice. A lovely new semi-double pink Windflower which Mr. Elliott personally considers about the loveliest thing he has seen in years. It is altogether the best and strongest grower. The flowers, when first opening, have the form of a rose; as they expand the shell-like silvery pink petals become suffused with bright carmine and show a lovely lilac center. 3 for \$1.00; \$3.00 per doz.

Buhler Kind. A new double white Windflower blooming several weeks earlier than the older sorts and having larger, finer, purer, double white flowers. 3 for 95c; \$3.00 per doz.

Kriemhilde. Tremendous quantities of large, double flowers colored a rich, dark pink. 3 for \$1.00; \$3.00 per doz.

Prince Henry. A magnificent new Windflower bearing gorgeous, full double red flowers which bloom much earlier than the other sorts. 3 for 80c; \$2.50 per doz.

Queen Charlotte. One of the most splendid of the Windflowers and the most lovely of all flowers. Immense quantities of broad and perfectly formed semi-double flowers with the color of the famous pink La France Rose. 3 for 80c; \$2.50 per doz.

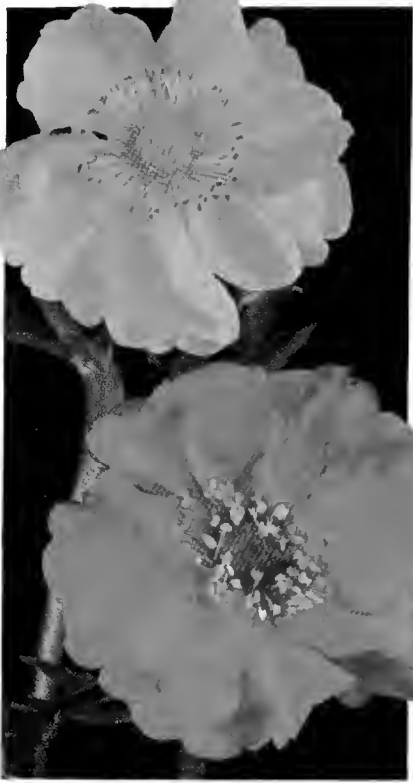

Richard Ahrends. An exquisitely lovely Windflower with large, splendid single flowers colored shell-pink and overlaid with a lilac bloom. 3 for \$1.00; \$3.00 per doz.

Rubra Flora Plena. Tremendous quantities of double flowers of loveliest rose-pink. Only September Charm produces more bloom. 3 for 80c; \$2.50 per doz.

September Charm. One of the newest of the Windflowers and one which produces more blooms for a longer time than any other. Indeed, there is hardly a plant of any kind which will produce the tremendous mass of flowers in your garden as will September Charm. The flowers, two inches or more in diameter, are colored lovely, delicate silvery pink shaded with rose and mauve, and are lovely beyond description. 3 for \$1.00; \$3.00 per doz.

Whirlwind. Exquisite double, white flowers in the greatest profusion. Whirlwind is Mr. Elliott's personal choice among all the Windflowers. 3 for 80c; \$2.50 per doz.

If wanted by parcel post, add 13c for each three plants; 27c per dozen.

Geums, Lady Stratheden
Mrs. Bradshaw

GEUM

Lovely tufted perennials producing a wealth of attractive flowers which bloom continuously from May to July. The plants grow about 18 inches high and are one of the finest of the garden plants, and they may also be used in the larger rockeries. Among professional florists the Geum is in tremendous demand for cut flowers, being considered one of the finest of all hardy plants for this purpose. Try combining Lady Stratheden and Mrs. Bradshaw in one bouquet and you will know why.

Lady Stratheden. Tremendous double flowers colored rich golden yellow. 3 for 90c; \$2.75 per doz.

Mrs. Bradshaw. Glorious double flowers colored a fiery red. 3 for 85c; \$2.50 per doz.

If wanted by parcel post, add 13c for each 3 plants; 27c per dozen plants.

The PERENNIAL FOXGLOVES (Digitalis)

FOR picturesque, stately beauty, Foxglove is not to be surpassed by any plant. In small groups in the garden it is most lovely. Planted among shrubs or naturalized on the edge of the woods, in the orchard, or along brooks, the effect is stunning. For over a century it has been the most popular plant in English gardens and its value is now being appreciated in America.

The Shirley. A magnificent new strain of perennial Foxgloves created by the Rev. W. Wilkes in England, which produces plants 6 to 7 feet tall with gorgeous flower heads over 3 feet long. The individual flowers are colored white, pink, and rosy red, attractively dotted with chocolate and crimson. A magnificent and permanent addition to any garden. 3 for 85c; \$2.50 per doz.

If wanted by parcel post add 13c for each 3 plants; 27c per dozen plants.

SEA LAVENDER

Statice Latifolia. The famous Baby's Breath is the most popular plant in the world for embellishing bouquets, and is used literally by the millions. Splendid as the Baby's Breath is for this purpose, the Sea Lavender is even better. If the amateur gardeners knew what we professionals know, the nurseries of America could not supply the demand for this great plant. Its lacy, delicate, lovely lavender-blue flowers are incomparably the finest bouquet embellishment in existence; besides the plants are indescribably lovely in the garden. 3 for 85c; \$2.50 per doz.

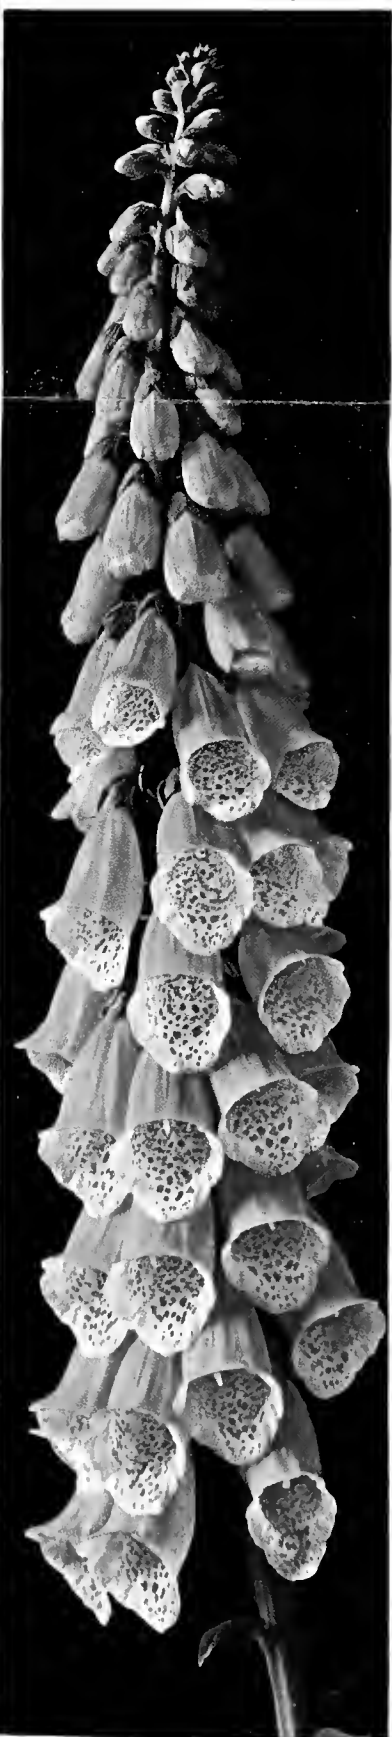

Statice Dumosa. The new Sea Lavender which created a tremendous sensation in English gardens. The flowers are produced in dense cushions and colored a most exquisite, pure cool silvery white. 3 for 90c; \$2.75 per doz.

If wanted by parcel post, add 13c for each three plants; 27c per dozen plants.

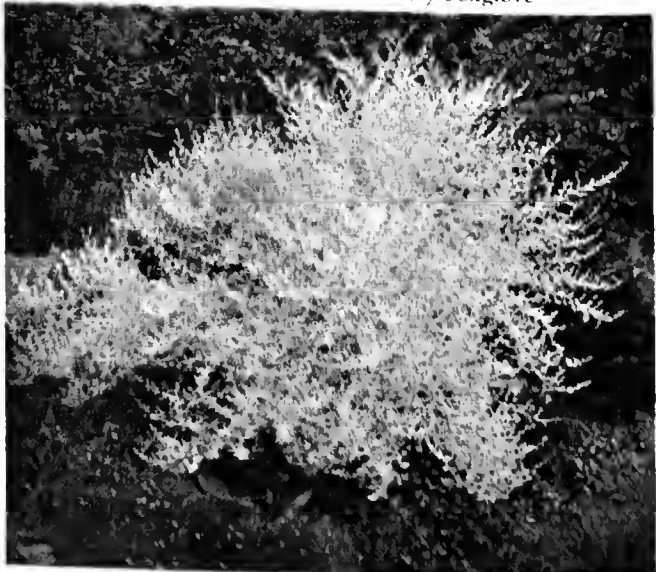

Artemisia, Silver King

The startling new Southernwood and absolutely the best of the decorative plants. The white-leaved foliage makes the plant look as though it were made of frosted silver, which gleams in the sunlight, producing a color contrast which can be secured with no other plant. It makes the most wonderful bouquets either alone or in combination with other flowers. If cut just before the first frost and put in a vase without water, it will last for months throughout the winter. We can suggest nothing as useful either for the garden or for the house. 3 for 85c; \$2.50 per doz.

If wanted by parcel post, add 13c for each three plants; 27c per dozen plants.

Shirley Foxglove

Artemisia, Silver King

Tall English

DELPHINIUMS

WE ARE tempted to say that the Improved English Delphiniums are the most beautiful hardy plants in cultivation. Blooming all summer, coming up year after year, sending aloft successive shafts of incredible color to a height of 6, 7, and 8 feet; every imaginable tone and shade of blue, lavender, and purple, it is doubtful if any other plant so superb as Delphinium ever graced a garden.

Few people are aware of the perfection to which the ancient flower has been brought by modern plant breeding, how easily it can be planted and grown, and how lasting a delight the gardener secures who plants Delphiniums.

We offer selected plants grown from seeds of famous named varieties and we promise you'll find positive joy in their extraordinary bloom.

New White Delphinium, Iceberg

For over fifty years plant breeders have been working to produce a pure white Delphinium and now at last in Iceberg the long sought for white Delphinium is here. The color is pure white, without a trace of nasty gray shade. Like other Hybrid Delphiniums the plants are tall, growing six feet or more, and their habit is that of the older Delphiniums. The new white strain requires no special treatment and should be handled exactly as you are accustomed to handling the older hybrids. 50c each; 3 for \$1.20; \$4.00 per doz.

Elliott's Magnificent Varieties

Grown from the finest Blackmore & Langdon strains. Range in color from very light blue to very dark blue, overlaid irregularly with tones of pink and lavender, rose, and lilac, black spots on pistil and anthers at center of flower. Many blossoms show white secondary petals at base of the major petals. A wonderful wealth of color variation. 3 for \$1.00; \$3.00 per doz.

Fine Mixed English Hybrids. Seedlings grown from the finest English and American strains. 3 for 75c; \$2.50 per doz.

Species Delphiniums

Belladonna. Uniform sky-blue flowers. 3 for 75c; \$2.50 per doz.

Bellamosa. Solid dark blue flowers. 3 for 75c; \$2.50 per doz.

Dwarf Chinese Delphiniums (Delphinium Chinense)

The lovely Chinese Delphiniums grow about 2½ feet.

Dark Blue. 3 for 65c; \$2.00 per doz.

White. 3 for 65c; \$2.00 per doz.

Cambridge Blue. The new azure blue Delphinium superseding Azure Fairy. A real improvement. 3 for 65c; \$2.00 per doz.

If wanted by parcel post, add 13c for each 3 plants.

Lilium Henryi

LILIES at WAR PANIC Prices

Poor Little Holland! Peaceful, tender, ing strictly to her own business, she endeavors to remain on friendly terms with the powerful neighbors which surround her. Instead of making guns she grows vast quantities of superlatively fine Lilies to sell to these neighbors. But her neighbors, anticipating war and thoroughly frightened, will buy nothing that cannot be used for killing. Europe trembles in fear as the armed legions of Hitler and Mussolini, grim and threatening, are mobilized. Terror stricken France, England, and the lesser nations strive desperately for more cannon, more gas and more war planes, while the dead lie thick on the fields of Spain. So Holland is stuck with the finest crop of Lilies the world has ever seen.

It may seem brutal that we, safe in America, should take advantage of this situation to buy these bulbs at less than half the cost of producing them. Yet the Holland grower must live and "half a loaf is better than no bread." So we have arranged to import for our customers on special order these fine Lilies at war panic prices.

The bulbs will be ordered especially for you by cable as required. The first cable will be sent about April 1st, the second April 15th, and the third April 25th, and it will take about 15 days for the bulbs to reach the United States. The grade, described by measuring the circumference of the bulbs, is shown for each variety.

Lilium Elegans, Mixed. 4 to 5 in. The number of flower forms and colors found in this group defy description. Gorgeous red and orange shades, rich purples and crimsons, delicate pale lemon-yellows, stunning orange-browns, all are here and more. And the blooming season commences in late June and continues through July when your other garden flowers are beginning to thin out. If Europe had time to think of anything besides slaughter, Lilium Elegans bulbs would cost you \$2.75 a dozen.

War panic price, \$1.80 a doz.; 3 for 55c.

Lilium Henryi (Yellow Speciosum) 7-9 in. Gorgeous, rich apricot flowers, 20 or more in a bunch carried on stalks 8 feet tall. Flowers in August and September. Since, if war comes, the flowers will not be provided for Europe's dead, Lilium Henryi instead of costing \$4.00 a dozen, can be bought for the war panic price of \$2.75 a dozen; 3 for 85c.

Lilium Elegans

Lilium Philippinense Formosanum

All plants sold under the standard non-warranty of the nursery trade as used by every reputable nursery in the world. All bulbs sold under Elliott's special money-back guarantee.

Lilium Speciosum Rubrum Magnificum

Lilium Speciosum Album

Lilium Philippinense Formosanum. 6-8 in. This lovely new gem produces around five very long trumpet shaped flowers, white with a reddish brown shading on the exterior, carried gracefully on each of the 2 1/2 to 3 ft. stems. The flowers are very fragrant, and the petals gracefully recurving. Besides being one of the loveliest, it is among the hardiest of Lilies. Blooms from late August until frost. Flowers will not be planted in the pill boxes of the Maginot line, nor in the bomb-proof shelters of London. Therefore, Lilium Philippinense does not cost \$2.75 a dozen. The war panic price is \$1.40 a doz.; 3 for 50c.

Lilium Regale. 8-10 in. The flower is flushed yellow, shading to white. Externally the flowers are reddish brown with a delightful pearly tint. Truly a royal Lily and most extraordinarily beautiful. Blooms in July. The European expects his garden may be blown to eternity before the plants have a chance to bloom and, therefore, you, safe in America, instead of paying \$4.00 a dozen for your bulbs of Regal Lilies may plant them at the war panic price of \$1.45 a doz.; 3 for 50c.

Lilium Speciosum Album. 8-9 in. Cost alone has heretofore prevented this stately, pure and serene beauty from growing in every garden. No flower known to horticulture has a better form, or grows in a more graceful manner. The color is glistening snow-white, and through the center of each petal runs a golden green stripe. In sharp contrast stand out the anthers, colored copper. Finally, it blooms in September, the month during which the garden is barest. When one's garden is drenched with poison gas one may not remove one's mask to inhale the fragrance of the flowers. Your garden will not be drenched with poison gas as your European friend's may be, and so you may safely plant Lilium Album not at the regular price of \$2.75 a dozen, but at the war panic price of \$3.75 a dozen; 3 for 85c.

Lilium Speciosum Rubrum Magnificum. 8-9 in. Magnificum is the pink twin of the incomparable white Speciosum Album and the perfect foil of its white color. Like Speciosum Album, it produces 10 to 12 flowers in a cluster on the top of a 4-ft. stem. Like Album, Speciosum Magnificum blooms in September. It is equally as hardy and as easily grown. The only difference is that the flowers are colored the loveliest imaginable ruby-carmine with a white margin. Caterpillar tanks rumbling across one's garden will destroy the garden and perhaps the owner, too. Knowing this, our European neighbors will not plant. It cannot happen here and you may plant in safety and save money doing it since you do not pay the regular price of \$2.75 a dozen but the war panic price of \$1.95 a dozen; 3 for 70c.

Lilium Tenuifolium. 4-5 in. Graceful flowers with sharply recurved, waxy petals colored an intense, brilliant, gleaming scarlet, which will make an accent that none can miss. It grows 18 inches high and flowers in June. Unlike most Lilies, Tenuifolium will stand considerable shade. Unhappy Europe, where each individual must sacrifice butter for guns! In America we may have both if we wish but only a few of us will wish guns. Instead you may want to plant Lilium Tenuifolium which does not cost \$1.50 a dozen as it should. The war panic price is 90c a dozen; 3 for 35c.

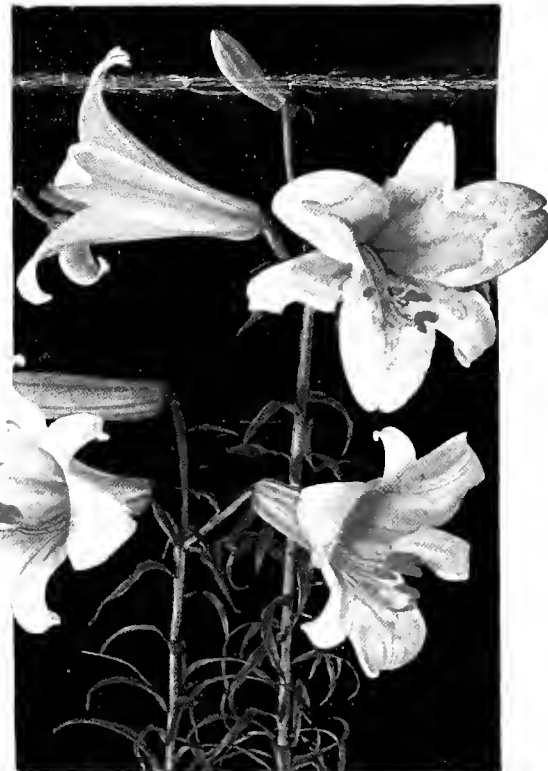

Lilium Tigrinum Splendens. 5-6 in. Your grandmother, who appreciated the finer things of life and had all she could get of them, planted Tiger Lilies almost automatically as a matter of course. Her descendants, it would seem, have forgotten this most beautiful and gorgeous flower and it is high time that they relearned about it. For the Tiger Lily is one of the richest, most colorful, and satisfactory plants in existence. The flowers, perfect in shape, are colored dark, rich salmon-orange, spotted intense glossy black. And the Tiger Lily, flowering in August and September, is robust, of easy culture, and hardy enough for Northern Minnesota. And if you plant a Tiger Lily no war plane will plant a bomb on top of it. Your garden will remain as peaceful as your grandmother's was and be less costly since Tiger Lilies no longer cost \$2.75 a dozen. The war panic price is 85c a dozen; 3 for 35c.

Long Spurred COLUMBINES

(Aquilegia)

FOR centuries before the Long-Spurred Columbines were thought of, Aquilegias were loved and cherished as being among the most valuable of all garden plants. Now that the dreams of the plant breeders have come true and the Long-Spurred Hybrids are an accomplished fact, the Aquilegias are even more popular than they were with our ancestors.

Caerulea (Rocky Mountain Columbine). The lovely light blue Long-Spurred Columbine which grows wild in the mountains of Colorado. 3 for 90c; \$2.75 per doz.

Dobbie's New Hybrids. Absolutely the finest and loveliest strain of Long-Spurred Hybrids in existence. 3 for 80c; \$2.50 per doz.

Lemon Queen. Newest and loveliest of the golden yellow Long-Spurred Columbines. 3 for 85c; \$2.75 per doz.

Silver King. The newest and finest white Long-Spurred Columbine. 3 for 85c; \$2.75 per doz.

The New Pink Columbine

Rose Queen. A new and very lovely pink Columbine. A pure color heretofore never obtainable. 3 for 95c; \$3.00 per doz.

The New Red Columbine

Crimson Star. A new Long-Spurred Columbine, the flowers of which are colored a brilliant, dark crimson. This is a color never before available in Columbines. The plant won the highest award at the recent Royal Horticultural Society's Show in England. 3 for 95c; \$3.00 per doz.

If wanted by parcel post, add 13c for each three plants.

Aquilegia

ORIENTAL POPPIES

"I REMEMBER well the first time I saw an Oriental Poppy. I was a boy then, and it excited me wonderfully, and I thought it was the most remarkable flower in the world. And now, after 50 years have gone by, and I have seen all the known flowers of the world, I am still of the opinion it is wonderful: one of the most striking and effective perennials in cultivation." Our founder, Mr. J. Wilkinson Elliott, wrote this 50 years ago and it is still true. One who has not seen the blazing beauty of the Oriental Poppies has not yet seen a garden.

Cerise Beauty. Very large, bright pink flowers with purple blotch. 3 for 80c; \$2.50 per doz.

Henri Cayeux. A new Poppy bearing mammoth flowers colored a lovely old rose with burgundy overtones. 3 for \$1.40; \$4.00 per doz.

Lula A. Neeley. This is the newest of the Oriental Poppies and is so superior to anything which has preceded it that it becomes by comparison the outstanding garden plant. The color is a brilliant oxblood-red and does not fade. The tremendous, gorgeous flowers are borne on strong, erect stems. 3 for \$1.30; \$3.75 per doz.

Olympia. In Olympia we have at last a true double Poppy. The color is a brilliant, vivid flame-scarlet overlaid with golden salmon. The double flowers are the earliest to bloom and are produced in tremendous quantities. 3 for 70c; \$2.00 per doz.

Oriente. Tremendous, cup-shaped blooms of the brightest, most vivid crimson-scarlet. 3 for 50c; \$1.60 per doz.

Perry's White. The most startlingly distinct Poppy variety and one of the world's outstanding flowers. Tremendous blooms of the purest satiny white with a crimson blotch at the base. Grown adjacent to the colored sorts, the effect is really breath-taking. 3 for \$1.40; \$4.00 per doz.

SPECIAL BARGAIN OFFER

Until recently the Poppy list was considered standard with little or no chance of improvement. However, within the past year or so the plant breeders have made some startling improvements. These new things will not be ready for the general public for some time, but meanwhile we intend to get ready for their arrival. So in order to make room for them we are cutting the price of Poppies in half.

Six varieties until last year considered the best of their several colors are scheduled for replacement in the future. The varieties are: **Bracteata**, crimson-scarlet; **Brightness**, orange-scarlet; **Edna Perry**, rose-pink; **Grand Mogul**, red; **Princess Ena**, orange-salmon; **Royal Scarlet**, blazing scarlet. Price, while they last: 3 for 50c; \$1.50 per doz.; \$11.00 per 100.

Oriental Poppy

New Korean 'Mums: Pink Lustre
Fortune
Niobe

New Korean Chrysanthemums

THESE new Hybrid Korean Chrysanthemums are better than the older types because they are hardier, more beautiful in color, earlier, easier to grow, and more profuse in blooming. The lovely new pastel shades, which defy description, suggest the Gerbera in their daintiness. Cut with short stems they make charming table decorations, while the full spike, 2 feet or more long, makes glorious bouquets. As garden flowers, they have no equal.

The parent strain of these gorgeously beautiful new Chrysanthemums are natives of Korea, which is one of the coldest countries in the world. As a consequence, they are much hardier and will stand much more abuse than the older types of Chrysanthemums.

Apollo. Superb sparkling combination of bronze, red and gold, suffused with glowing salmon. Single flowers, 2 inches across, produced in immense sprays.

Fortune. The flowers are deep oxblood-red, 4 inches in diameter. The petals are curved and the plant is exceptionally vigorous.

Mars. Striking deep amaranth-red, changing to wine-red, overlaid with velvety sheen.

Niobe. A vigorous, compact plant, producing an immense quantity of bloom. The clear, glistening white petals make a brilliant halo around the glistening yellow central disc.

Pink Lustre. A rather tall variety producing flowers nearly four inches in diameter and colored a lovely and delicate orchid-pink.

Vesta. The flowers of this new beauty are colored golden orange-red, rich and deep.

Any of the above varieties: 3 for 95c; \$2.75 per doz.

HARDY CARNATIONS

THE Carnation flowers which you buy from your florist are tender plants which must be grown in a greenhouse. For years there has been a persistent demand for hardy Carnations for garden use and the plant breeders have answered the demand, giving us four new creations. If the flowers are cut off, the plants will produce Carnations for you all season. The flowers resemble the florists' Carnation and are very lovely.

Crimson King. The gorgeous new crimson Carnation, dazzling in color, and the finest of all the Carnations. 3 for 95c; \$2.75 per doz.

Grenadin Pink. The lovely new pink Carnation. 3 for 80c; \$2.25 per doz.

Grenadin Red. The beautiful new red Carnation. 3 for 80c; \$2.25 per doz.

Grenadin White. The stunning new white Carnation. 3 for 80c; \$2.25 per doz.

GAILLARDIAS

WE consider the Gaillardia the most beautiful and desirable hardy plant in cultivation, and believe our strain to be the finest extant, and we offer these plants for less than they have ever been sold for, either in this country or Europe. The Gaillardia is, of course, simply invaluable as a cut flower on account of its being so lasting when gathered and so brilliant and beautiful. The gay blossoms are obtainable in perpetual profusion from June to November, and the greater the drought and scarcity of other flowers, the more the utility of the perennial Gaillardia is demonstrated. Some of the varieties of this improved strain measure fully five inches in diameter.

Burgundy. This new variety produces truly enormous flowers 4 inches or more in diameter—the largest Gaillardia flowers in existence. The color is deep, rich Burgundy-red, the deepest red of all the Gaillardias. 3 for \$1.00; \$3.00 per doz.

Goblin. A new and compact dwarf Blanket Flower blooming from July until October. When in bloom the foliage is completely concealed under the large masses of bright yellow blooms with deep red centers. When cut the flowers will last a week or more in water. 3 for \$1.00; \$3.00 per doz.

Lemon Queen. A new Gaillardia with tremendous flowers nearly, if not quite, as large as Burgundy; colored purest, richest and cleanest golden yellow with a bronze center. 3 for 80c; \$2.25 per doz.

GOLDEN GODDESS

For at least half a century, plant breeders have been searching for a perfect golden yellow Gaillardia and at last in Golden Goddess success has crowned their efforts. The flowers of the gorgeous new Golden Goddess are really colored golden yellow—petals, centers, every part of the flower is golden yellow and there is no suggestion of any other color. The flowers are large, almost, if not quite, as large as those of Burgundy. Golden Goddess has the longest blooming season of all the Gaillardias, even longer than Goblin. In our tests it started to bloom in late May and bloomed continuously and prolifically all through the summer and fall until October 16th, when we cut our last flowers. Finally the plant itself is not straggly but compact and upright, and perhaps most important it is as completely hardy as the old-fashioned types.

We, who have known and handled plants for over half a century, consider Golden Goddess the final answer to the long sought for yellow Gaillardia and we recommend it without qualification. 3 for \$1.35; \$4.00 per doz.

Upper Flower: Burgundy
Lower Flower: Golden Goddess

All plants sold under the standard non-warranty of the nursery trade as used by every reputable nursery in the world. All bulbs sold under Elliott's special money-back guarantee.

Except where noted if plants are wanted by parcel post, add 13c for each 3 plants; 27c for each dozen plants.

Hardy Pompon Chrysanthemums

CHRYSANTHEMUMS are the last plants to bloom in the fall and make the garden glow when there are no other flowers to be had. No other class of plants give such a wide range of color—white, yellow, bronze, scarlet, crimson, with innumerable intermediate softer tones. In masses they are particularly effective, while scattered clumps enliven the whole garden. Chrysanthemums in your garden mean flowers a month after your neighbor has none.

THE CUSHION CHRYSANTHEMUMS

The original pink form of this new group of Chrysanthemums became in three short years the most widely planted perennial in existence. This tremendous popularity is justified. First, it is a most prolific bloomer and in a favorable situation will bear around five hundred flowers during its season. Indeed, beginning in September, the plants will be completely covered with bloom all fall. The individual flowers are splendid in form and lovely in color. Cushion Chrysanthemums are adaptable to virtually every garden use—including the perennial border, the rock garden, landscape backgrounds and, of course, they make effective cut flowers.

Bronze Cushion. Hundreds of deep, rich, coppery bronze flowers.

Pink Cushion. The original Cushion Chrysanthemum producing hundreds of lovely, light pink flowers.

White Cushion. Pure, glistening white flowers by the hundred.

Yellow Cushion. Hundreds of pure, glistening golden yellow flowers.

Any of the above varieties: 3 for 85c; \$2.50 per doz.

STANDARD TALL CHRYSANTHEMUMS

Crimson Splendor

Aladdin. Beginning in July the flowers of Aladdin appear in an endless procession until frost. Its exquisite color resembles that of the famous Talisman Rose, being lovely golden bronze and stained apricot, light red and damask-pink.

Annie Fletcher. Gorgeous, clear yellow flowers, borne on stately stems produced in tremendous quantities during October. Unlike many Chrysanthemum varieties, the foliage is good and the fine leaves cover the entire stem throughout the growing season. A truly splendid variety.

Crimson Splendor. Magnificent masses of rich crimson-maroon flowers, intensified with deep garnet tones, golden yellow center. Each flower is 4 inches in diameter.

Early Bronze. Immense quantities of the loveliest imaginable bronze flowers blooming two to three weeks earlier than the average Chrysanthemum.

Endeavor. Hundreds and hundreds of deep, rich, coral-pink single blooms on 24-inch stems. The hardiest of all the Chrysanthemums.

Granny Scoville. Flowers $4\frac{1}{2}$ inches in diameter colored a warm coral-bronze that fairly glows. Mr. Elliott maintains that this is the finest of all the Chrysanthemums.

Grenadier. Glowing clusters of crimson-red flowers $3\frac{1}{2}$ inches in diameter. Each separate flower has a golden tint on the petal reverse to make a marvelous contrast with the bright crimson of the main flower. This variety produces flowers in tremendous masses and in full bloom is glorious beyond description.

Louise Schling. The flowers, which measure fully 3 inches in diameter, are colored a glowing copper-salmon-red and are produced in immense quantities.

Murillo. The newest and beyond question the finest pink Chrysanthemum. The flowers, about 3 inches in diameter, are colored the loveliest and richest possible old rose.

Rapture. Early in September, Rapture produces the loveliest deep orange flowers suffused with carmine. Really exquisite.

September Queen. The outstanding white variety and a real improvement over what has gone before. The individual flowers measure $3\frac{1}{2}$ inches across and the color is the clearest, cleanest white. The plants grow compactly and when in full bloom resemble huge balls of snow.

Aladdin

Pink Cushion

Annie Fletcher

Any of the above varieties: 3 for 85c; \$2.50 per doz.

SHASTA DAISY

Chrysanthemum Maximum

THESE are improvements over the famous Shasta Daisy created by Luther Burbank. The flowers measure 4 to 6 inches in diameter, and are borne on long stems. In addition to their garden value, these Daisies are universally considered the finest possible plants for cut flowers.

Astrid. The first Pink Shasta Daisy and an exquisitely lovely one. The flowers, over 3 inches in diameter, are colored a beautiful shell-pink. 45c each; 3 for \$1.05; \$3.50 per doz.

The Prince. The newest and incomparably the finest of all pure white Shasta Daisies, with flowers 5 to 6 inches in diameter. 3 for 75c; \$2.25 per doz.

White Swan. A new double Shasta Daisy and a truly great creation. It produces solid, double, pure white flowers on 2-ft. stems. The flowers, some 3 inches in diameter, are produced in immense quantities. 50c each; 3 for \$1.25; \$3.75 per doz.

Shasta Daisy, White Swan

The BUSH CHERRIES

The New Fruit with the Sensational Taste

FOR over forty years Prof. N. E. Hansen of South Dakota State College strove to create a Cherry which would produce fruit as finely flavored as the best of the standard types and be small enough to be used anywhere. The brilliant answer to his long years of labor is found in the New Dwarf Cherry which does not grow above four feet tall.

PRICES

	Each	3	Doz.
12 to 18 inches . . .	\$0.45	\$1.15	\$3.50
18 to 24 inches55	1.45	4.50

Parcel Post on Hansen Cherry, one plant, 9c; 3 plants, 13c; 12 plants, 18c.

Even if the New Dwarf Cherries produced no edible fruit they would still be a valuable acquisition for our shrubbery borders. In the spring the white flowers are exceedingly lovely, the glistening foliage, turning to red and gold in the fall, is handsome all season and the plant's habit of growth makes it a compact, symmetrical, handsome shrub, which incidentally may be used for hedging as Barberry or Privet is used.

However, the chief glory of the New Dwarf Bush Cherry is its wonderful fruit, which is borne in immense quantities. A properly grown, well-developed plant will yield a half-bushel of luscious cherries. These cherries are a lovely sight on the bush. The skin of the fruit is colored a rich and glistening purple with red lights. The color of the flesh is light green and the individual cherries are about an inch in diameter. Properly planted, fruit will be produced after one year. The fruit is delicious as it comes from the bush and makes wonderful preserves and pies; it is very sweet and when used for cooking requires a little less sugar than ordinary cherries.

There is, of course, no question about its hardiness. It was developed in South Dakota where winter temperatures of forty degrees below zero are an annual occurrence.

These Cherries are true dwarfs and should be planted 4 feet apart.

DAPHNE CNEORUM

THROUGHOUT the late depression there was only one plant in the entire list, the sales of which did not fall off. Every year, without exception, we have sold every first class Daphne we had. When one knows Daphne, this is not to be wondered at, since it is about the loveliest plant that grows out of the ground.

The Daphne is a dwarf, trailing, evergreen shrub which never grows above a foot tall. It is absolutely the finest plant in existence for rock gardens. It is the loveliest thing imaginable for edging evergreen or other plantings. In bloom it is covered with indescribably beautiful soft pink flowers and it usually blooms twice and sometimes 3 times a year.

Daphne requires alkaline soils, so if your soils are not naturally alkaline, add lime.

DAPHNE CNEORUM

These are large, balled and burlapped plants of the finest quality and cannot be mailed. All orders for this superlative grade will be shipped by express.
